

Manually Changing Your Cloud Server Password

1. To manually change your password once you've logged into the Terminal Server click the **Start** button, then select **Windows Security**.

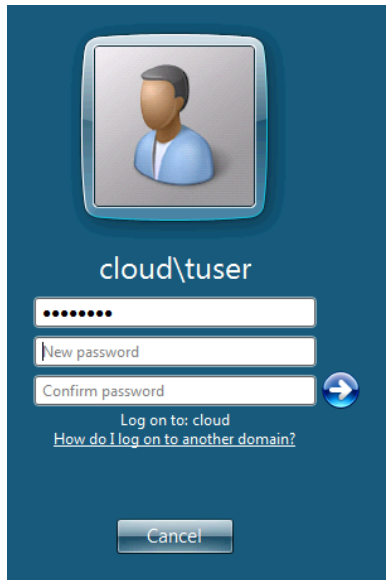

2. Select **Change a password** to manually change your password.

3. Enter your current password in the **“Old Password”** field. Enter your new password in the **“New Password”** field, then enter that password again in the **“Confirm Password”** field.

Password requirements:

- a. The password must be at least 5 characters long
- b. It can't be any of the last three passwords you've used

4. Click the arrow next to Confirm password to save the changes and hit Cancel.
